

Here are some helpful Hints for attaching the QR Kidz Travelmate to your Britax car seat

It is important to note that the position and length of the QR Kidz Strap is adjustable. **To adjust the strap position or length, simply unscrew the binding posts, reposition or lengthen the strap and then re insert and screw the binding posts back together. Once you have your optimal set up you will not need to alter it for your car seat.**

- 1) Start By laying your car seat face down on the floor. Now lay the Travelmate down onto the seat positioning the support tabs underneath the bottom of the Ribs as shown. The Travelmate should be centered on the car seat with the handle near the top of the car seat.

- 2) Feed the pre-attached ladder strap through the space in the back of the car seat where the car seat belt is normally fed.

- 3) Next, insert the ladder strap into the ratchet buckle. To tighten simply use the ratchet buckle to feed the ladder strap through until secure.

- 4) Your QR Kidz Travelmate is now ready for use.
